[linkedin.com/in/omid-abed](https://www.linkedin.com/in/omid-abed) 

## OBJECTIVE

A highly motivated engineer, skilled in electromagnetic/photonic device designs and familiar to artificial intelligence; with 2 years' experience in cutting-edge research.

## EDUCATION

**MSc in Electrical Engineering – Field and Waves | University of Tehran 17.00 / 20**

2017 – 2020

**Thesis:** Optical beam steering based on Tunable Metasurfaces for LIDAR Applications

**Advisor:** Dr. Leila Yousefi

**BSc in Electrical Engineering - Telecommunications | Azad University (with honors) 18.08 / 20**

2012 – 2016

**Final Project:** Simulation of OFDM systems

## EXPERIENCE

**Researcher | Nanophotonics Research Group – University of Tehran**

2018 – 2020 (<http://www.nanophotonics.ir>)

- ✓ Designed a novel tunable beam steering device using phase change materials in the near-IR range.
- ✓ Designed a novel tunable 2-dimensional beam steering device using transparent conducting oxides in near-IR range.
- ✓ Achieved a solid background in machine learning (especially deep learning) to use it in further researches e.g inverse design, optical neural networks.
- ✓ Performed numerous numerical Multiphysics analysis on nanophotonic structures (electromagnetic, AC/DC, and semiconductor analysis).
- ✓ Collaborated with other students in the lab or research meetings.
- ✓ Redesigned and updated group website.

**Chief Teaching Assistant | University of Tehran (Engineering Electromagnetics) 2019- 2020**

- ✓ Chief teaching assistant in engineering electromagnetics course for undergraduate students.
- ✓ Designed homework problems.

**Teaching Assistant | University of Tehran (Circuit laboratory) 2017-2018**

- ✓ Teaching assistant in circuit laboratory course for undergraduate students.

**Microcontroller programming Intern | Nira System. 2016**

- ✓ Learning fundamentals of microcontrollers and helping senior engineers for programming AVR Microcontrollers.

## SKILLS

- COMSOL MULTIPHYSICS
  - ✓ High frequency simulations
  - ✓ AC/DC simulations
  - ✓ Semiconductors Analysis
  - ✓ Heat Transfer Simulations
- PYTHON
  - ✓ Numpy
  - ✓ Pandas
  - ✓ Sklearn
  - ✓ Tensorflow
- MATLAB
  - ✓ 5 years' experience in scientific programming
- OTHER
  - ✓ Lumerical FDTD
  - ✓ CST studio suite
  - ✓ Microsoft Office
  - ✓ Adobe illustrator

## PUBLICATIONS

### Submitted Manuscripts

1. Abed, O., Ghaffari, V., Yousefi, L. "Tunable Metasurfaces using Phase Change Materials and Transparent Graphene Heaters" (under review in Nanophotonics). More detail in [here](#)
2. Abed, O., Yousefi, L. "Free Space Beam Shaping Using phase-change Reconfigurable metasurfaces" (Submitted in 3rd West Asian Symposium on Optical and Millimeter-wave Wireless Communications)

### Manuscripts in preparation

3. Abed, O., Yousefi, L. "Two Dimensional Beam Steering Using Tunable Metasurfaces Based on Transparent Conducting Oxide". More detail in [here](#)

## HONORS

- Achieved rank 25 in national university entrance exam (Konkur) for MSc in electrical engineering, among more than 30,000 competitors (in top 0.1%).
- Former member of Iran rowing national team. Winner of a bronze and a silver medal in Asian Junior Championships.

## CERTIFICATIONS

### Silicon Photonics Design, Fabrication and Data Analysis

- ✓ Conducted by Sharif University of Technology ([certificate](#))

### Deep learning Specialization

- ✓ Conducted by Coursera ([certificate](#))

### Machine Learning

- ✓ Authorized by Stanford University – Conducted by Coursera ([certificate](#))

## LANGUAGES

**English: Fluent**

**Persian: Native**
